

SAKSHI CHANDRA

Ayodhya, India

+91-6307359883 | sakshi2507chandra@gmail.com | [LinkedIn](#) | [GitHub](#) | [Leetcode](#) | [Portfolio](#)

EDUCATION

Vellore Institute of Technology, CGPA: 8.48

2022 – 2026

B.Tech. in Computer Science and Engineering (E-Commerce Technology)

Madhya Pradesh

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML, CSS

Frameworks & Tools: React.js, Node.js, Express.js, Bootstrap, Docker, Firebase, MySQL, VS Code, Colab, PowerBI, Excel

Cloud & Deployment: Vercel, Render, Railway, GitHub, Streamlit

Product & Growth Skills: Dashboard Development, Data Visualization, Cohort Analysis, KPI Tracking, Business Analytics

EXPERIENCE

Eutien Technologies – Web Development Intern [↗](#)

Feb 2025 – May 2025

- Architected and delivered a full-scale e-commerce platform from ground up, building **8+ reusable modules** that accelerated feature development across the project lifecycle.
- Collaborated with the **Apps Solutions & Services (AS&S)** team across web application projects, contributing to all stages of the development lifecycle.
- Built a fully responsive, dynamic frontend using **React.js, HTML, CSS, and JavaScript**, ensuring cross-browser compatibility across Chrome, Firefox, and Safari.
- Engineered **15+ RESTful backend endpoints** using **Node.js and MySQL**, enabling seamless data flow between frontend and server with an average API response time under **200ms**.
- Optimized SQL queries for product catalog and order management through **indexing, query restructuring, and elimination of redundant joins**, improving readability and execution efficiency.

PROJECTS

Gatherlytics – Event Planning Platform [↗](#) | Node.js, React, Docker, Vercel

January 2026

- Architected and deployed a full-stack, AI-driven event planning platform using **Node.js, React, and Bootstrap**, supporting end-to-end workflows from event creation to personalized recommendations.
- Built **12+ reusable React components** and dynamic UI workflows, ensuring a consistent and responsive user experience across devices.
- Integrated a **custom-trained ML classification model** achieving **83% accuracy** to power intelligent event category suggestions and personalized recommendations.
- Developed **RESTful APIs** connecting the frontend with the ML prediction pipeline, delivering real-time event suggestions with **sub-300ms latency**.

Event-Planner Classification Model [↗](#) | Colab, Python, Scikit-learn, Pandas, Streamlit

October 2025

- Designed, trained, and benchmarked multiple classification models to predict event types from structured input data.
- Achieved peak accuracy of **83% with Random Forest**, outperforming Decision Tree by **11 percentage points**.
- Engineered input features using **OneHotEncoding** for categorical variables, improving model generalization and reducing overfitting.
- Serialized the production-ready model using **joblib** and integrated it into the Gatherlystics platform via a Streamlit-powered API interface.

Revenue Analytics Dashboard | Power BI, DAX, Power Query, Excel

2026

- Designed and developed an interactive multi-page **Revenue Analytics Dashboard** to analyze **13.01K+ revenue**, **198 orders**, and **49 customers** through real-time business insights.
- Built **4 analytical modules** including **Overview, Cohort Retention, Revenue Trends, and Customer Segmentation** to monitor customer behavior and sales performance.
- Implemented **cohort retention analysis** with monthly tracking matrices, identifying an average customer retention rate of nearly **33%**.
- Developed interactive visualizations including **time-series revenue charts, donut charts, bar graphs, slicers, filters, and matrix tables** for drill-down analysis and trend identification.
- Performed data cleaning and transformation using **Power Query**, handling missing city/location values and optimizing datasets for efficient dashboard rendering.
- Analyzed regional revenue distribution across cities such as **New Delhi, Lucknow, and Mumbai**, identifying top-performing regions contributing over **35%** of total revenue.

ACHIEVEMENTS

- Secured the Volleyball Championship title at Advitya'23 inter-college sports fest, demonstrating teamwork and competitive excellence.
- Solved **280+ Data Structures & Algorithms** problems on LeetCode and HackerRank, showcasing strong problem-solving and algorithmic skills.
