SUMMARY

Computer Science undergraduate graduating in 2026 with hands-on experience in **backend development, REST APIs, databases, cloud deployment, and data analysis**. Skilled in **Java, SQL, JavaScript, Node.js, React.js, MySQL, and Docker**, with experience building, integrating, and debugging full-stack applications.

EDUCATION

Vellore Institute of Technology, CGPA: 8.48

2022 – 2026

B.Tech. in Computer Science and Engineering (E-Commerce Technology)

Bhopal, Madhya Pradesh

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Backend & Frameworks: Node.js, Express.js, React.js, REST APIs, Bootstrap

Databases & Tools: MySQL, Firebase, Docker, Postman, Git, GitHub

Cloud & Deployment: Vercel, Render, Railway, Streamlit

Data & ML: Pandas, Scikit-learn

EXPERIENCE

Eutien Technologies – Web Development Intern [🔗](#)

Feb 2025 – May 2025

- Architected and delivered a full-stack e-commerce platform, building **8+ reusable modules** with a focus on maintainable architecture and efficient feature development.
- Collaborated with the **Apps Solutions & Services (AS&S) team** across web application projects, contributing to development and delivery across the software development lifecycle.
- Developed a responsive frontend using **React.js, HTML, CSS, and JavaScript**, implementing reusable components and troubleshooting client-side integration and usability issues.
- Engineered **15+ RESTful backend endpoints** using **Node.js and MySQL**, enabling reliable frontend-server communication with average API response times under **200ms**.
- Optimized SQL queries for product catalog and order management using **indexing, query restructuring, and redundant-join elimination**, improving query efficiency and maintainability.

PROJECTS

Gatherlytics – Event Planning Platform [🔗](#) | Node.js, React, Docker, Vercel

January 2026

- Architected and deployed a full-stack event planning platform using **Node.js, React, MySQL, and REST APIs**, supporting end-to-end event creation and recommendation workflows.
- Developed **12+ reusable React components** and integrated frontend workflows with backend services and database operations.
- Developed **RESTful APIs** connecting user interactions with the recommendation pipeline, delivering real-time suggestions with **sub-300ms latency**.
- Containerized the backend using **Docker** and deployed application services using **Vercel and Render**.
- Troubleshooted and resolved **API, database, CORS, and deployment issues** during integration of frontend, backend, and cloud services.

Event-Planner Classification Model [🔗](#) | Colab, Python, Scikit-learn, Pandas, Streamlit

October 2025

- Designed, trained, and benchmarked multiple classification models to predict event types from structured input data.
- Achieved peak accuracy of **83% with Random Forest**, outperforming Decision Tree by **11 percentage points**.
- Engineered input features using **OneHotEncoding** for categorical variables, improving model generalization and reducing overfitting.
- Serialized the trained model using **joblib** and integrated it into the Gatherlytics platform through a Streamlit-powered interface.

HireSight – Job Aggregation & Insight Platform [🔗](#) | React.js, Node.js, Express.js, LLM

August 2025

Group Project

- Architected a centralized job aggregation platform integrating listings from **3 major portals**: Internshala, Naukri.com, and LinkedIn, into a unified interface.
- Engineered an **ETL pipeline** to scrape, clean, deduplicate, and normalize **1,000+ job listings**, ensuring consistent data across multiple external sources.
- Developed backend workflows using **Node.js and Express.js** to process aggregated job data and integrate it with the platform's frontend and analysis pipeline.
- Integrated an **LLM-based engine** for semantic skill extraction, domain classification, and demand trend detection, and built dashboards to visualize market insights.

ACHIEVEMENTS

- Secured the Volleyball Championship title at Advitya'23 inter-college sports fest, demonstrating teamwork and competitive excellence.
- Solved **270+ Data Structures & Algorithms** problems on LeetCode and HackerRank, demonstrating strong algorithmic problem-solving skills.
